

GAS DISTRIBUTION PANEL FOR GC,AAS & ICP

Gas Distribution Panel

- Gas distribution panel is used when there is no more than one gas chromatograph
- It helps to control the flow & pressure of different gases for different CC's.
- Available in three different types. One is with pressure gauge, pressure regulator. ON/OFF valve.
- Second with pressure gauge and ON/OFF valve.
- Third is with only ON/OFF valve.

Gas Selector Box

Gas Selector Box

- Used for selection between two gases of different types.
- Available in two different types one with selector valve,
- pressure gauge & toggle valve, another with only two toggle valve.

Gas Changeover Box (Cylinder vs Generator)

- Used for selection between cylinder & gas generator
- To use gas from cylinder when gas generator is break down for service or maintenance.

Air N₂ H₂
